

I oppose the loosening of media property ownership limits. I strongly believe doing so will negatively effect our democracy. The FCC is charged with protecting and managing the PUBLIC'S airwaves. By allowing media corporations to gobble up more stations and consolidate control of the message you are failing to serve the public and doing damage to our democracy.

Please reconsider this move and do not allow corporate media to gain more control over the already narrowing media options the American People have.

Sincerely,
Eric Magnuson
